# Enjoy cleaner air in every room

Breathing airborne pollutants often trigger allergy, asthma and hay fever symptoms. As house dust, mould, virus carriers and pollen are captured by the Ductair Natural Air (DNA) filter, we generally breathe easier and have fewer symptoms. Having a high quality air filter installed in a well maintained ducted air conditioning system can result in a cleaner, healthier indoor environment.

***“The air in our home has never felt fresher and cleaner”***

*Michael – West Beach*

The easy to install Ductair Natural Air (DNA) filter protects your system as it traps particles that would otherwise coat the coils and reduce their efficiency. This means that you save on energy costs, equipment and maintenance by having a more efficient system.

***“Ordinary filters are designed to protect the a/c equipment, the DNA filter goes far beyond that to protect the occupants in your home”***

Ductair DNA with Flanders media has the highest dust holding capacity and lowest pressure drop than any other media in its class. This means it has the best filtration available but won't compromise the effectiveness of your system.

The Ductair Natural Air (DNA) uses a Flanders Merv-8 filter media. Flanders is committed to continuously developing new and improved products to assist in an environmentally responsible, healthy, and prosperous environment.

*Your Authorised Air conditioning Specialist*

**To ensure your home always has filtered, clean air, take these easy steps to reorder the DNA filters.**

**STEP 1** Check the number on your current filter by looking at the original ID card, the sticker on your filter or the sticker inside your return air grille. See [ductair.com.au/DNA](http://ductair.com.au/DNA) for instructions.

**STEP 2** Log onto [ductair.com.au/DNA](http://ductair.com.au/DNA), enter your postage address, billing details (security through paypal) and filter number or call 1800ductair (1800 382 824) to talk directly to one of our sales members.

**STEP 3** Install your new DNA filter and enjoy the filtered, clean air throughout your home.

*Note: You can also choose to have your replacement DNA filter installed by Ductair.*

***“The DNA filter is so easy to replace, Ductair contact you every 6 and 12 months to ensure you always have filtered, clean air”***

*Tracey - Prospect*
